

GALACTICO-7

Data Center Resource Management

Assembling All-Star Data Center Teams

www.galactico-7.com

Company Overview

Galactico-7 is an enterprise-grade workforce solutions and human data resource management firm specializing in the data center ecosystem. We identify, deploy, and manage elite technical talent across critical physical infrastructure, engineering, and digital operations. By fusing data-driven human resource architecture with deep domain expertise, we assemble the "all-star" teams required to eliminate downtime, mitigate operational risk, and sustain hyper-scale infrastructure for our global partners.

Vision

To be the definitive global engine for data center workforce solutions, transforming how digital infrastructure leaders identify, deploy, and optimize elite human capital to power a zero-downtime world.

Mission

At **Galactico-7**, we accelerate the growth of global digital infrastructure by delivering elite, data-vetted talent at the speed of technological innovation. We empower our partners across the data center ecosystem by handling their entire critical human capital infrastructure, transforming workforce deployment into a powerful competitive advantage.

GALACTICO-7

Our Core Competencies

The **Galactico-7** Standard: We don't just fill vacancies. We treat human capital as a precise, strategic asset to eliminate downtime, de-risk critical facility operations, and maximize infrastructure performance for our partners.

The **Galactico-7** drives digital infrastructure growth by rapidly deploying pre-vetted data center specialists, securing high-impact technical leadership, and managing global compliance and workforce data analytics under a single, frictionless ecosystem.

✓ **Data Center Management**

✓ **Recruitment Process Outsourcing**

✓ **Talent Acquisition**

GALACTICO-7

SECTOR SPECIFIC SOLUTIONS

At Galactico7, we recognize that high-consequence industries require more than generic staffing. We deliver specialized human capital solutions tailored precisely to the technical demands of your field. By embedding deep domain expertise into our data-driven sourcing framework, we mitigate risk and ensure compliance. Whether navigating complex infrastructure projects, agile software deployments, or stringent medical regulations, we speak your language. We don't just provide resources; we deliver the exact operational expertise your specific industry demands.

Energy & Infrastructure

We provide resources and teams for power generation work such as **Solar Panel Installation**, dedicated microgrid development, turbine commissioning, and **battery energy storage systems (BESS)** designed to power hyper-scale digital infrastructure.

We ensure your facility has the green energy expertise required to meet aggressive sustainability targets while maintaining absolute grid reliability.

Technology & Engineering

We deliver specialized **Mechanical, Electrical, and Plumbing (MEP)** engineers, technical experts, and critical facilities talent essential for maintaining 100% data center uptime.

This includes deploying specialized teams equipped to handle mission-critical **Data Center Server Setups, DCIM Software Administration**, and precision **Data Center Cabling**.

Additionally, we provide comprehensive human capital solutions for **Engineering, Procurement, Construction, and Installation (EPCI)** projects, alongside elite **Enterprise Resource Planning (ERP)** professionals to streamline your corporate infrastructure.

Data Center Management

At **Galactico-7**, we handle the end-to-end resource provisioning and specialized recruitment in **Design and Engineering, Construction & Execution, Utilities and Infrastructure** across the entire data center lifecycle such as:

- **Mechanical & Electrical Engineers**
- **Network & Data Engineers**
- **Specialty Contractors**
- **Commissioning Agents**
- **Electric Utilities & Grid Operators**
- **Construction Project Managers**
- **Project Schedulers**
- **Electrical Project Managers**
- **MEP Project Managers**
- **Commissioning Project Manager**

WHY CHOOSE GALACTICO-7?

At **GALACTICO-7**, We don't just fill seats; we de-risk your operations. By combining elite talent acquisition with predictive human resource data, we protect your bottom line, eliminate costly hiring delays, and ensure your projects are executed by an all-star team that delivers immediate ROI.

Optimized Labor Spend

We use precision market data to structure your compensation models, ensuring you win top-tier talent globally without overpaying or extending your payroll budget.

Maximized Output Per Hire

Our talent undergoes rigorous technical performance vetting, they integrate faster and deliver measurable project value from day one.

Seamless Scalability

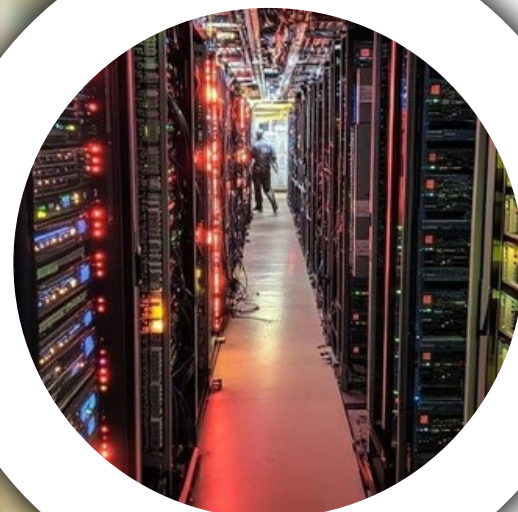

Our agile network deploys the exact talent you need, exactly when you need it.

Elite-Only Vetting (Top 5%)

We don't flood your inbox with generic CVs. Our data-driven screening filters out the noise, presenting only the absolute top tier of verified industry professionals.

Predictable Retention Data

We use predictive modeling to match candidates not just on skills, but on long-term cultural and project alignment, cutting your turnover rates in half.
